Geme Monitor

Put your energy consumption monitorized thru Internet

Innovative system for on-line energy monitoring with customizable logger.
Perfect control of energy costs after the setting of energy tariffs

Control and alarm over the failure of pre-defined quality parameters.
Reports of total consumption regarding a period of time and comparison with the pre-defined consumption budget.

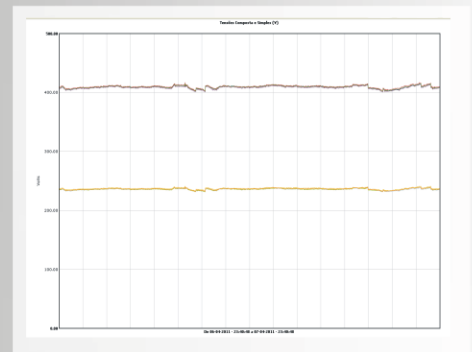

Hourly consumption profile, optimized for the energy spot market.

Large history information for statistical purposes and security analysis.

KEY FEATURES

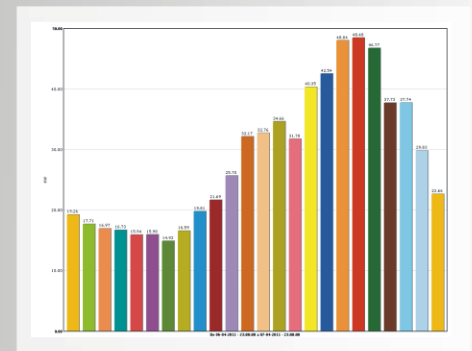

- Real time analysis for:

Consumption
Voltages
Frequencies
Currents
Harmonics

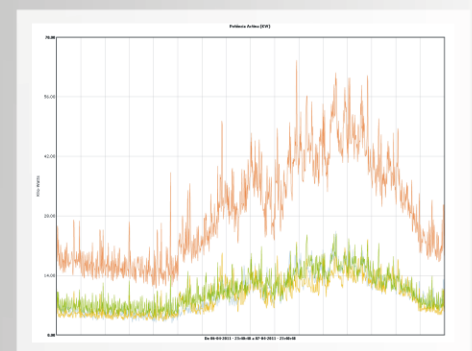

- Real time alarms for :

Poor quality of supply
Exceed the monthly Budget
Exceed the maximum power

- Customizable logger for :

Quality Parameters of supply
Consumption
Energy Costs
